

Datasheet

## 3 Pcs Aluminum Heatsinks

RS Stock No:

### Product Details

This is an aluminum heat sink specially made for Pi4.

It is very low profile and simple. It can be attached to the SOC heating chip tightly, which can effectively transfer heat and reduce the heat of the raspberry pi itself.

### Features and Benefits

- Material: Aluminum alloy
- Precision cutting
- Good heat dissipation effect
- Suitable for Raspberry Pi and other development boards
- CNC machining

## Specifications:

Material	Aluminum alloy
Heat Dissipation Rate	47.37% Test Env: 76°C
Operating Temperature:	0°C~76°C ( $\leq$ 75% R.H.)
