# Acrylic Case
for Raspberry Pi and 3.2" Display

Build a small Tablet PC based on Raspberry in no time at all. This case was especially designed for the Raspberry (B+, 2B, 3B) and the 3.2" V2 Touch Display. It consists of high-quality, transparent acrylic.

When mounting, please note that the housing parts are covered on both sides with a thin film for protection. This foil must be removed before mounting.
