shipping weight: 1.60 kg
Manufacturer: GSM Activate

Product Description

GSM Activate 3G Intercom

The GSM Intercom incorporates a professional industrial grade GSM engine. It receives calls at its SIM number, as any ordinary GSM phone. You can attach the intercom to your existing electronic gates. This enables you to speak directly to visitors and allow access (or not) to your property using your mobile phone.

The GSM Intercom is housed in a brushed stainless steel vandal proof box. It comes with a high quality backlit call button. The GSM Intercom is easily wired into your gate or garage door systems. The box is small and durable and can be easily stored outside as it is housed in a perfectly weathered box (IP65 rating). It has also been tested in high heat and freezing weather conditions.

Specifications
