📄 Product Description

Fibaro Temperature Sensor, 4-packThe temperature sensor is a digital thermometer sensor that is programmable with a 9 to 12 bit resolution. Best suitable for temperature measurements in homes and offices.Because the sensor is so small, you can place it anywhere you like. Each sensor comes with a 64 bit security code. This gives you the possibility to connect several sensors in one wire line. With a power supply of only 3 V to 5.5 V, it can be directly powered via the data line.This temperature sensor can be used in combination with the door / window sensor and the binary sensor.

- Temperature range: -10 °C to 85 °C with an accuracy of 0.5 °C
- Pack of 4 devices
