Product Description

TRITON RZA-15-A66-CAX-A1 - Dismountable free-standing cabinet, 15 HU, 600 x 600 mm

A big cabinet with a narrow door – that's exactly what the RZA cabinet was designed for. Thanks to the design of its individual parts and a sophisticated method of assembly using Taptite screws, it has the same high capacity and stability as the welded version.

Removable parts

Individual RZA parts are bolted together to form a compact unit with the same maximum load capacity as a welded cabinet. Most of the parts are joined by Taptite thread-forming screws. This ensures a very high rigidity of the bolted connection even after being disassembled any number of times. The product is supplied assembled and can be moved to difficult to reach places after partial or complete disassembling.

Breakout-type blanking panels

Entry openings for cables (370 x 90 mm) in the rear part of the cabinet are covered with breakout-type blanking panels. To avoid dust penetration, it is possible to seal the cables at the entry opening with a brush strip, eventually just secure by a plastic protective frame (both supplied with the cabinet).

A large opening in the top covered with a breakout-type blanking panel enables mounting and removal of a Triton fan unit from outside of the cabinet without a need of using screws.

Removable side panels and rear cover

RZA has a welded frame and removable side panels. These are fixed as standard to the frame using a lock with the same key as the door and rear cover.

Rigid construction

The RZA has a robust bolted construction. High quality workmanship and up-to-date technology ensure a perfect look of the cabinet.

Flexible door opening

The hinge system allows the door to be opened up to almost 180°. The door can be easily removed and re-mounted to change the direction of opening.

TRITON handles

TRITON manufactures their own handles for the free-standing cabinets. By changing the plastic module (not included), a traditional or semi-cylindrical lock insert can be used. Patent: PUV 2013-27443

Door for fan units

With this cabinet type, it is possible to order a special metal door ready for mounting RAX-CH-X0x-X3 fan units. Further information is available in the section Active cooling.

Castors, levelling feet

Prepared for mounting castors and levelling feet.

Size in mm:

- 770 x 600 x 600

Beipack:

- 2x keys - rear and side panels
- 2x keys - door
- 16x captive nuts M6
- 1x blanking panel with brush
- 1x frame for cable entry
- 4x levelling feet
- 4x nuts M10

Material:

- Safety hardened glass, 4 mm thick
- Steel sheet
