790-2811 - Raspberry Pi - Pi NoIR Camera

24,03 EUR

Item no.: 790-2811

shipping weight: 0.30 kg

Manufacturer: Raspberry Pi Foundation

Product Description

Raspberry Pi - Pi NoIR CameraThe Pi NoIR gives you everything the regular camera module offers, with one difference: it does not employ an infra-red filter (NoIR = No Infra-red). This means that pictures you take by daylight will look decidedly curious, but it gives you the ability to see in the dark with infrared lighting. We bundle a little square of blue gel with the Pi NoIR, which you can use with the Pi NoIR to monitor the health of green plants. The Pi NoIR is very popular among wildlife hobbyists: with a few infra-red LEDs, you can monitor what nocturnal animals are doing in your garden without disturbing them. The camera works with all models of Raspberry Pi 1 and 2. It can be accessed through the MMAL and V4L APIs, and there are numerous third-party libraries built for it, including the Picamera Python library.
