SPAHA48-1300E - Telescopic Rafter Bracket, 1300 mm High, 870-1200 mm Rafter Distance

117,95 EUR

Item no.: SPAHA48-1300E
shipping weight: 6.20 kg
Manufacturer: Televes

Product Description

Televes Telescopic Rafter Bracket, 1300 mm High, 870-1200 mm Rafter Distance As the rafter brackets will be mounted from outside on the rafters, no roof penetration is necessary and the insulation will not be damaged. In this way, no antenna mast will interfere with a loft conversion. The installation is much easier than with conventional systems, and thus very cost-effective. The problem with condensation water is superfluous, as the warm indoor air cannot condense on the cold pipe. Antenna cables can be routed through the tube of the SPAHA48/... series in connection with the mast cap MAKAP4850K. The rafter brackets are also ideal for low-energy houses, as there is no longer a cold bridge.

- Tube length: 1300 mm
- Tube diameter: 48 mm
- Roof pitch: 0° - 90°
- Dynamic pressure / N : 800**
- Max. reflector size / mm: 1000
- Grounding screw: Yes
- Einzelverpackung/VPE: Ja - 1 /50
- Mast cap: Yes
- Screws 10 x 100: 6
- Incl. screws: Yes

**= Corresponds to a wind speed of 35 m/sec (wind force 12)
