📄 Product Description

MikroTik RB960PGS - RouterBoard hEX PoE, 800 MHz CPU, 128 MB RAM

The hEX PoE is a five-port gigabit Ethernet router for locations where wireless connectivity is not required. The device has a USB 2.0 port and a SFP port for adding optical fiber connectivity. The ports 2-5 can power other PoE capable devices with the same voltage as applied to the unit.

It is affordable, small and easy to use, but at the same time comes with a very powerful 800 MHz CPU, capable of all the advanced configurations that RouterOS supports.

Less power adapters and cables to worry about! Maximum current is 1 A per port, Ethernet ports are shielded.
