Product Description

RG316 Cable Configuration

With our cable configuration, you can get made the right coax cable for your individual needs. You can choose from the available options on the right the connectors you need and the appropriate cable length. We will take it from there.

The high-frequency cable RG316 is a very thin coaxial cable with a diameter of only 2.6 mm. The cable has a silver-plated outer braid, an impedance of 50 ohms and is used as a pigtail in antenna systems and wireless networks. As an RF connector, you can use the small MMCX connector and the larger SMA connector, TNC connector, N connector and BNC connector. At 2.4 GHz, it has an attenuation of about 1.5 dB/m at 5.7 GHz and about 2.66 dB/m.
