shipping weight: 0.90 kg
Manufacturer: MikroTik

Product Description

MikroTik CRS112-8P-4S-IN - Cloud Router Switch with 400 MHz CPU, 128 MB RAM

CRS112-8P-4S-IN is an eight Gigabit RJ45 ports PoE switch that offers different power output options: auto-sensing 802.3af/at PoE/PoE+ and passive PoE, and four SFP ports provide optical fiber connectivity options to support uplinks of up to 1 Gbps.

CRS112-8P-4S-IN is equipped with 12 independent switching ports. A 28 V, 3.4 A power supply is already included in the box. There is a secondary DC jack on the back of the enclosure that supports 48-57 V power supply (not included, can be purchased separately). CRS112-8P-4S-IN can power 802.3af/at devices if 48-57 V DC input is used (unit will automatically detect and provide correct power to devices). Max. current is 1 A per port if the input voltage is 18-28 V, 450 mA if 48-57 V. The total limit is 2.8 A (at) 24 V and 1.4 A (at) 48-57 V.

MikroTik's CRS series combines a fully functional router and a manageable switch with L3 features and is powered by the familiar RouterOS. All the specific Switch configuration options are available in a special Switch menu, but if you want, ports can be removed from the switch configuration and used for routing purposes. It gives you all the basic functionality for a managed switch, plus more: it allows you to manage port-to-port forwarding, apply MAC filter, configure VLANs, mirror traffic, apply bandwidth limitation and even adjust some MAC and IP header fields. IGMP snooping is also supported. Included:

- Power adapter (28 V, 3.4 A)
- Rackmount ears
- Power cord
- Screws

- Product code: CRS112-8P-4S-IN
- Size of RAM: 128 MB
- Storage type: Flash
- Storage size: 16 MB
- 10/100/1000 Ethernet ports: 8
- SFP ports: 4
- Serial port: RJ45
- PoE out: Yes, 802.3af/at
- Supported input voltage: 18-57 V
- Dimensions: 200 x 143 x 40 mm
- Operating system: RouterOS, Level 5 license
- Max. power consumption: 10 W
