

Item no.: UH-TP-5-24

UH-TP-5-24 - UltraHorn TP antenna

463,18 EUR

Item no.: UH-TP-5-24
shipping weight: 13.60 kg
Manufacturer: RF Elements

Product Description

RF Elements UH-TP-5-24 - UltraHorn TP antenna The UltraHorn(TM) TP antennas are highly directional, scalar horn antennas with a high gain. They offer ultra-strong noise suppression, a lossless connection to the radio and a symmetrical beam without side lobes. The absence of side lobes allows UltraHorn(TM) TP antennas to reject noise in high noise environments with unparalleled performance. No need to spend more money on radomes or shrouds. No extra cost for additional shielding. Simply purchase a suitable TwistPort(TM) adapter to connect and deploy your radio. All UltraHorn(TM) TP antennas are equipped with a unique, patent-pending, quick-connect TwistPort(TM). TwistPort(TM) connections are virtually lossless and a revolutionary advancement in wireless scalability and ease of use. UltraHorn(TM) TP antennas support a wide range of third-party wireless devices with our TwistPort(TM) adapters. - Antenna connector: TwistPort(TM) - Quick release connector- Antenna type: Horn- Materials: UV-resistant ABS plastic, polycarbonate, polypropylene, aluminium, stainless steel- Protection class: IP55- Mast diameter: 30-80 mm- Temperature: -30°C to + 55°C (-22°F to + 131°F)- Wind resistance: 160 km/h- Wind load: 210 N at 160 km/h- Mechanical tilt: +/-25°- Weight: 8.2 kg- Dimensions: 55.0 x 55.0 x 66.6 cm
