Product Description

ALFA APOE01 - Passive PoE Base Unit for Power over Ethernet

The APOE01 is a passive PoE basic module for power supply via the Internet connection (Power over Ethernet). PoE means that it will work with any voltage power supply that will fit. The power jack is made to fit 48 volt DC power supply. Compatible with all MikroTik RouterBoards. You may need a voltage-step-down adapter to make sure that the final voltage going to the AP or router is not too much.

- RJ-45 input/output connector
- Input/output common ground
- Power/data mixer
- Ethernet switches expand to wireless access point
