Product Description

GSM Activate - GSM Protect Van Alarm

The GSM Protect is an anti-theft alarm manufactured by GSM Activate. It can be connected to many vehicles including mobile homes, caravans, planes, boats and jet skis. In fact, anything that has a built in battery that the alarm can be connected to. The GSM Protect houses a GPS system as well as incorporating all the GSM capabilities. For ease of use the GSM Protect can be used either wirelessly or wired into the battery. Neither will affect the unit's capabilities to alert you to a potential theft of your property.

The GSM Protect can be triggered in a variety of ways such as using the wireless PIR or door contact which is supplied as standard or you can also trigger it yourself using external devices. Once the alarm has been triggered the unit will then alert you using a telephone call first followed by a text message as well as sounding an audible two minute wired siren. Furthermore, in the event that the intruder gets away with your property the unit houses a GPS tracker. Therefore, enabling you to track and find the location of your property.

The GSM Protect has a clever built in GPS system. This system enables you to track your property in the unfortunate event that your vehicle has been stolen. By sending the unit a text message it will respond with a location code. All you need to do is copy and paste the location code into a web browser or maps application and you will have the exact location of your property.
