📄 Product Description

Patchkabel CAT.6A S/FTP 2 m 10G shielded, foiled twisted pair bare copper

The network cable is a 2 meter long gigabit copper Patchcord LAN cable, for indoor use. LAN Patchcord is a basic element of computer networks operating in Ethernet standard. It is used to directly connect two active devices, such as a router or switch, so that data can be transferred between them. It is also used to connect computers or Voip telephones for structured cabling and to perform patch panel switching in IT cabinets. It is perfect for both large and small computer networks. Shielded patchcord is highly flexible, which translates into installation convenience and comfort of use.

The category 6A SFTP shielded patchcord ends in gold-plated, shielded RJ45 plugs. It consists of a four-wire twisted-pair cable made of pure copper, which makes it possible to power network devices in PoE standard.

- Length: 2m
- Cable for installation Inside buildings
- Cable category: Cat.6A
- Cable shielding type: SF/UTP
- Colour: Blue
- Cable outer sheath: LSZH
- Cable type: Patchcord

- Cable type: 4 twisted pairs
- Guide material: Copper wire, pure copper
- AWG: 26
- Cable coating: PE
- Cable shell thickness (mm): 0.28
- Cable sheath diameter (+/-0.05 mm): 1.04
- External coating: LSZH
- Shield: aluminium foil
- Coating thickness (mm): 0.6
- External diameter (+/-0.2 mm): 6.0
- Colour: Blue
