Product Description

CAN-CONTROL - CAN adapter for car sharing solutions

CAN-CONTROL is the latest addition to Teltonika's CAN solution family. It allows remote doors and windows closing control, which is ideal for car sharing and mobility solutions for car rentals, car sharing providers, and corporate fleet management providers.

CAN-CONTROL can read not only such essential CAN parameters like: fuel level, odometer, VIN number, fuel consumption, but can also read engine RRM, engine temperature, or handbrake status. This way you can effectively identify areas of improvement within your vehicle operation to drive down overheads and minimize environmental impact.
