Product Description

Gigaset Box 200A black

The Gigaset Box 200A is a DECT telephone base that can be set up flexibly with an integrated answering machine. The recording time is up to 30 minutes and up to 6 handsets can be added to the base. In addition to DECT, the base is also compatible with the GAP standard. When choosing the handsets, we recommend that you use the HX handsets from Gigaset. The Box 200A is operated using the registered handsets, the answering machine can also be controlled using buttons.

This device is intended and designed for the telephone connection in the German network; unrestricted operation outside of Germany cannot be guaranteed. FUTURE-PROOF BASE STATION

The BOX 200A supports landline and Internet telephony, regardless of the provider. It has an external range of up to 300 meters. SIMPLY COMPATIBLE

Register up to 6 Gigaset HX handsets to your base station. Ideal for companies, families or for the home office. AN ANSWERING MACHINE FOR EVERY GENERATION

The digital answering machine has a recording time of up to 30 minutes. The announcement can be spoken individually for 180 seconds. EASY HANDLING

Never miss any more calls with the convenience of DECT. It is operated on the phone or using the buttons on the device. Internal handset name can be customized. QUALITY MADE IN GERMANY

Gigaset BOX 200A is made in Germany - thanks to ECO DECT, radio transmission is automatically reduced depending on the distance between the handset and the base station.
