Product Description

023-00133 - FMB9YX 1.5 m Power Cable with Fuse

The FMB9YX series 150 cm long main connector power cable with a fuse box is very suitable when external power cables are far from the desired mounting location and the length of the standard device cable (70 cm) is not enough. The 1.5 m power cable will help you reach even the furthest corners of a car.

Thanks to the ample length, this cable also allows to mount tracking devices more discreetly. Besides, a fuse provides additional safety and protection for the device power management.
