Product Description

AS-5-20 - Sector Antenna with Carrier Class Performance

RF elements(R) Array Sector antennas provide exceptional RF performance, colocation capability, ease of installation, and cost efficiency. The antennas feature RF Elements' patented BackShield(TM), a frequency selective surface that attenuates the side lobes in the azimuth plane and back radiation, integrated directly in the antenna body.

Array Sector 5-20 operates in an extremely wide frequency band, has balanced gain in both polarizations, and offers unmatched main lobe stability for superior coverage performance.
