C6 (NO SENSOR) - Lightweight Wearable Beacon

from **15,49 EUR**

Item no.: 343430

shipping weight: 0.10 kg

Manufacturer: MINEW Technologies

Product Description

C6 - Wearable Beacon

The wearable C6 beacon advertises standard iBeacon and Eddystone (UID, URL, TLM) simultaneously. As one of the most popular beacons for personal management applications, C6 is widely used in trade shows, schools and offices. The user can configure the C6 wearable beacon via the configuration app BeaconSET+. It can also work with the G1 BLE WiFi gateway for data management on the system if needed.

Besides, it is recommended to use C6 beacon for on-the-move proximity advertising in retail and events because of its lightweight and portable design.
