Product Description

E7 Location Beacon with Accelerometer

The E7 location beacon is IP67 waterproof and the smart rotatable mechanical housing design makes it user friendly. Besides, it advertises standard iBeacon, Eddystone (UID, URL, TLM) and accelerometer sensor data simultaneously. Users can download the configuration app BeaconSET+ to configure E7 beacon parameters.

Moreover, the E7 beacon with accelerometer advertises sensor data only when an object (E7 attached) is moving or after an object has fallen. It can be widely used in proximity, retail, navigation, tracking, etc.
