📄 Product Description

C10 Card Beacon with Accelerometer

The C10 card beacon is a new generation beacon which has a Bluetooth® 5.0 hardware platform, hidden push button, 3-axis accelerometer sensor and RFID tag. The push button can be used as panic/emergency/SOS button. LF (125 KHz), HF (13.56 MHz) and UHF (868~915 MHz) RFID are optional.

The C10 card beacon advertises standard iBeacon, Eddystone (UID, URL, TLM) and accelerometer sensor data simultaneously. The user can configure it via the BeaconSET+ configuration app.

- Protocol options: iBeacon, Eddystone
- Advertising: Advertising interval: From 100 to 5000 ms; Tx power: -40 dBm, -20 dBm, -16 dBm, -12 dBm, -8 dBm, -4 dBm, 0 dBm, 4 dBm; Additional configuration options: Configure mode, non-connectable mode; Configuration app: BeaconSET+ for Android/iOS
- Radio: Version: Bluetooth Low Energy 5.0; Frequency: 2.4 GHz; Chipset: nRF52; Antenna: PCB antenna; Range: Up to 100 meters

Parameters

- Enclosure: Material: ABS+PC; Color: White; Size: 85.5 x 54 x 4.5 mm; Weight: 18.5g (LF, HF)/15.5 g (UHF)
- Battery: Replaceable: No; Capacity: 800 mAh (LF,HF)/550 mAh (UHF)
- Features: Accelerometer sensor: Optional; 125 KHz RFID (LF): Optional; 13.56 MHz NFC (HF): Optional; 868~915 MHz RFID (UHF): Optional
