📄 Product Description

Aluminium Case in Black for use with Raspberry Pi

This lightweight yet durable enclosure from RS PRO is designed to house and protect Raspberry Pi 3 models, boards, electronics and internal components. This easy to assemble Pi box is supplied in kit form and includes all required components to build a robust and high quality Raspberry Pi case.

The kit includes a passive extender board to move the HDMI and micro USB connectors onto the same plane as the Raspberry Pi Ethernet and USB connectors, as well as the required screws, standoffs and plates. The Raspberry Pi case also features dovetail slots along the external sides, allowing mounting brackets to be installed and mounted to a surface. The components of the RS PRO Raspberry Pi 3 case are manufactured from a combination of nylon, steel, aluminium and acrylic, offering a lightweight yet highly durable enclosure with a professional aesthetic. Furthermore, the 3 mm acrylic rear panel allows for communication via Bluetooth and Wi-Fi signals from the Pi 3, ensuring the Raspberry Pi performs to a high standard at all times without interference.

- For use with: Raspberry Pi
- Color: Black
- Series: Pi 3 enclosure
- External dimensions: 108.50 x 108.50 x 30 mm
- Body material: Aluminium
