📑 Product Description

PT4-DIY-01 - Development Board Case in black for use with Raspberry Pi 4
The pi-top[4]DIY is the only Raspberry Pi 4 case with a built-in battery and power management system. The 5 hour internal battery makes projects running for a longer time.
The best-in-class power management system includes soft shutdown and UPS to avoid SD card corruption. The integrated heat sink and centrifugal cooling fan make temperature regulation a breeze, even with overclocking.
Interact with your Raspberry Pi on-the-go with the 128x64 OLED mini screen and programmable buttons. Full access to the Raspberry Pi's GPIO and ports.

- For use with: Raspberry Pi 4
- Color: Black
- Series: PT4
