Product Description

Orange diagonal cutter 12.7 cm

This side cutter by Delock is suitable for the finest cutting work and can be optimally used in electronics and precision mechanics.

Due to the ground and sharp cutting edges, the side cutter is suitable, among other things, for thin and tight wires, as well as harder material. The handles are insulated and the joint is provided with a stainless steel rivet, while the rubberized structure ensures an optimal hold.

Due to the precisely shaped tip and the slim shape, this side cutter also cuts through adjacent wires from a diameter of 0.2 mm. The small facet also makes it possible to carry out very small jobs, e.g. B. on circuit boards.

- Metal pliers with plastic handles
- Soft wire suitable for cutting: 0.2 - 0.8 mm
- Copper wire suitable for cutting: up to 1.5 mm
- Hard wire suitable for cutting: up to 0.8 mm
- Opening spring and opening limiter
- Color: orange
- Dimensions (LxWxH): approx. 135 x 57 x 10 mm
