63110 - LCD cable tester RJ45 / PoE / DC

from **67,13 EUR**

Item no.: 344478
shipping weight: 0.30 kg
Manufacturer: Delock

Product Description

LCD cable tester RJ45 / PoE / DC

With this cable tester from Delock, the assignment of network cables can be tested quickly and easily. The results are clearly shown on the illuminated LCD display. The remote unit can be used to check cables that have already been laid.

The PoE standard and the wire pairs used for a PoE voltage source can be determined. With a connected consumer, the current voltage, polarity, current and power are displayed in real time.

- Matrix LCD display with backlight
- 6 control buttons
- Display of interruption, short circuit, crossed wires
- Display for used PoE standards 802.3af or 802.3at
- Display for used PoE wire pairs (12/36) or (45/78)
- Display of voltage, polarity, current and power for PoE or DC
- Test range voltage: DC 0 - 60 V
- Current test range: 0 - 3 A
- Power test range: 0 - 180 W
- Automatic power-off mode
- Flashlight function
- Color: dark gray
- Dimensions (LxWxH): approx. 12.5 x 6.9 x 2.8 cm
- Package content: network cable tester, remote unit, DC cable approx. 30 cm, bag, operating instructions
