

Item no.: 345267 Low Loss Antenna Cable RG58, 4 m

## Product Description

Low Loss Antenna Cable RG58, 4 m

The 50 Ohm CS29 cable (RC58 C/U cable) is a 5 mm high quality double shielded high frequency cable. One of the characteristics of the Panorama Antennas CS29 cable is the flexibility of the cable. The dielectric consists of white polyethylene, which is insulated with an aluminum foil and a wire mesh. The cable sheath consists of thermoplastic elastomers.

- Attenuation: 2.2 dB at 10 m 400 MHz; 3.8 dB at 10 m 1 GHz; 5.5 dB at 10 m 2 GHz
  Shielding: < -85 dB in relation to IEC 61196-1</li>
  Color: Black

- Outer jacket: TPE
  Temperature range: -40°C/+80°C
