Item no.: 345773

RPCP-XX - Pilot board for Raspberry Pi (formerly RasPiComm+)

from **57,15 EUR**

Item no.: 345773
shipping weight: 0.10 kg
Manufacturer: Amescon

📄 Product Description

PiloT Expansion Board for Raspberry Pi

The PiloT expansion board (formerly RasPiComm+) connects to your Raspberry Pi to add additional features such as digital and analogue I/O, serial ports, sensors, relays, GSM and GPS. The PiloT has four module slots on the board. In each slot you can add a PiloT-compatible module for the function you want.

- Easy customisation
- 32-bit ARM microcontroller for real-time operation and PLC functions
- Altera CPLD for wiring and logic
- Real-time clock
- Open source software and driver support for Raspbian
- Detects and configures all connected devices
- Powered by the Raspberry Pi board
- 50 mA power consumption
- Mounting holes for module slots (M2, screws included)
- Optional debugging pin socket
- Cut-out for Raspberry Pi display cable
- Operating displays
- Mounting holes aligned with Raspberry Pi
- Raspberry Pi connector
- Dimensions: 80 x 56.2 mm
