from **8,28 EUR**

Item no.: 346902
shipping weight: 0.10 kg
Manufacturer: CanaKit

📄 Product Description

Micro-USB male-to-micro-USB female with power switch, Black.

The Canakit PiSwitch provides a high quality and reliable power switch for Raspberry Pi 3 B/B and Pi Zero. It is made of high quality components to minimise electrical resistance. A low quality switch can produce a high electrical resistance and reduced voltage, so the conductivity and material of the switch is critical when used with the Raspberry Pi. This product is not compatible with Pi 4.

- Slim high gloss finish
- Integrated LED display
- High-quality components with minimal electrical resistance
