Product Description

TOF-2400-8V-4 - LoRa/WLAN Omni Antenna Kit 8 dBi 2400-2500 MHz

Working with the WAP LR2 kit or similar setups? For extra network coverage (up to 3-4 km in the line of sight), MikroTik suggest adding an external 8 dBi omni antenna - the TOF-2400-8V-4. If necessary, this antenna can be used for any 2.4 GHz device. Not only it works with the 2.4 GHz LoRa® connectivity, it also supports the regular 2.4 GHz WLAN. It comes with a 1 m long SMA cable and a mechanical holder for quick and easy mast attachment – when you need that extra network coverage. Compact size and increased durability without sacrificing the power – this antenna will get the job done.
