## Product Description

FMB225 - Waterproof GPRS/GNSS Dual-SIM Tracker with RS232, RS485 Interfaces

Teltonika FMB225 is water and dust resistant tracker with internal GNSS and GSM antennas, Bluetooth connectivity and backup battery. FMB225 is designed for communication with various third party RS232 or RS485 devices, like digital fuel sensors (LLS), Garmin navigation device, RFID reader and much more. With Teltonika CAN adapters, FMB225 can be used in agriculture or construction & mining without any risk of water or dust to the device because of IP67 casing. It is totally protected from dust and remains safe during the short periods of immersion in water up to 1 m depth. FMB225 is also excellent for refrigerated transport, because it has extended input/output set and 1-wire interface for temperature monitoring.
