Product Description

1-Wire Temperature Sensor

The digital temperature sensor probe is based on Dallas DS18B20 sensor. An 8 meter cable length will not require any additional wires for even the most demanding installation places. These sensors operate in wide temperature range from -55°C to 125°C. It's a perfect monitoring solution for the following use cases:

- Thermostatic controls – maintain temperature near a desired set point.
- Thermally sensitive systems – receive alerts when temperature enters or leaves a pre-defined value.
- Consumer products – be assured that goods which you are delivering will maintain high quality
