📄 Product Description

Carrier reefer data cable
Make sure that precious cargo of your customer or yourself arrives at its destination undamaged and well maintained. You can now monitor real-time data from Carrier reefers with Teltonika FMX6 pro tracker. The solution is easy to install – just plug one end to RS232 port of FMX6 and other to Carrier reefer*. After applying simple configuration, you will be able to monitor real-time temperature, fridge door status, alarms and generate variety of events according your needs.
*With the first edition/version of cable it is required to connect wires on one end to RJ45 plug.

- Supported carrier refrigerators models: Vector 1800, Vector 1850, Vector 1850 MT, Vector 1550
- Cable length: 70 cm
