AEOEZW189_UK - Range Extender 7 - UK

from **38,74 EUR**

Item no.: 357932
shipping weight: 0.50 kg
Manufacturer: Aeotec

Product Description

Wireless technology isn't always perfect, which is why Aeotec introduces the UK version of the Range Extender 7 - a simple plug-and-play device that perfects your home automation system. It receives Z-Wave and Z-Wave Plus signals, repeats them and then retransmits them to your Z-Wave automation network to increase their range and reliability. The Aeotec Range Extender 7 works seamlessly to amplify and repeat weak Z-Wave and Z-Wave Plus signals.

- Simply plug it into a wall socket: connect it to your Z-Wave network and it automatically starts to enhance all weak Z-Wave signals in range
- Based on Aeotec's proprietary Gen7 hardware and firmware stack: radio range is up to 250% greater than Range Extender 6 and non-Gen7 technology
- The Aeotec Range Extender 7 is based on the most advanced wireless automation technology available: it couples Aeotec's unique Gen7 technology stack with Z-Wave Plus V2 and the 700 Series. This enables a wide range of enhancements, including S2 security and SmartStart installation

The UK version of the Aeotec Range Extender 7 is compatible with many certified Z-Wave gateways.

ATTENTION: The use of this device is restricted or not allowed in some countries due to the frequency ranges used. Please check with the authority responsible for your country.

- Z-Wave Repeater - A simple plug-and-play device
- Built with the Z-Wave 700 series - longer range, more efficient and better performance compared to older generation series
- Wireless technology: Z-Wave Plus V2
- SmartStart enabled
- S2 security
- Plug type G
- Power supply: 230 V 50 Hz, max.: 150 mA
- Power consumption: 1.2 W
