Item no.: 357930
Range Extender 7

from **37,78 EUR**

Item no.: 357930
shipping weight: 0.50 kg
Manufacturer: Aeotec

📄 Product Description

Wireless technology isn't always perfect, so Aeotec has developed the Range Extender 7 - a simple plug-and-play device that perfects your home automation system. It receives signals from Z-Wave and Z-Wave Plus, amplifies them and then sends them back to your Z-Wave automation network, increasing their range and reliability.

Aeotec Range Extender 7 improves the quality of your automation system. And it increases its performance. Because it's based on Gen7 technology, it offers wireless performance that provides up to 250% more range and responds up to 50% faster than other non-Gen7 technologies.

Simply plug it into a wall socket, connect it to your Z-Wave network and it will automatically start enhancing any weak Z-Wave signals that are within range.

The Aeotec Range Extender 7 is based on the most advanced wireless automation technology available. It combines Aeotec's unique Gen7 technology with Z-Wave Plus V2 and the 700 series. This allows it to offer a wide range of enhancements, including S2 security and SmartStart installation.

The Aeotec Range Extender 7 is compatible with many certified Z-Wave gateways.

- Z-Wave 700 series - higher range, more efficient and better performance compared to older generation series
- Z-Wave signal amplifier
- Power supply: 230 V 50 Hz, max: 150 mA
- Plug type E/F
- Z-Wave Plus V2
- S2 Security
- SmartStart (setup with QR code)
- IP20
- Power consumption: 1.2 W
