### Product Description

This docking station from Delock can be connected to a computer with USB-C™ or USB Type-A port and provides a variety of interfaces. Two monitors can be operated simultaneously on the HDMI outputs. Four integrated USB 2.0 ports and two USB 3.2 Gen 1 ports enable the use of peripherals, and connections for a microphone and speakers and Gigabit networking complete the features.

Full HD (1080p) resolution is possible when using only one monitor and also when outputting to both HDMI outputs simultaneously.

Due to the Displaylink graphics chipset, it is possible to use mirrored and extended screen functions under Windows and Mac OS operating systems.
