Item no.: 357928

Aeotec Z-Stick - USB Adapter with Battery Gen5+

from **52,34 EUR**

Item no.: 357928
shipping weight: 0.50 kg
Manufacturer: Aeotec

📄 Product Description

This is how you can easily enter the world of Smart Home: Simply plug the Aeotec Z-Stick - USB Adapter with Battery Gen5+ into a PC, notebook, barebone, Raspberry Pi, etc. and it becomes the Z-Wave control centre for your Smart Home.

The Z-Wave network is controlled via the "Z-Wave Serial API" (according to the "Z-Wave Application Programmers Guide, INS10247"). This is also used by well-known Z-Wave control programs such as IP Symcon, Homeseer, etc.. This means that the USB stick can be used universally with various Z-Wave software solutions.

Thanks to the battery integrated directly in the stick, you can still include (teach) or exclude (remove) devices in your Z-Wave network using the local button on the stick, even when the PC or notebook is switched off.

- Z-Wave controller as USB stick
- Radio technology: Z-Wave Plus
- SmartStart capable
- S2 Security
- Has a backup battery
- Compatible with Raspberry Pi 4 or older versions and also with Windows, Linux and iOS
- Manages up to 232 Z-Wave devices
- Universally usable with various Z-Wave software solutions
