### Product Description

Powered by 3rd Generation Intel® Xeon® Scalable Processors (formerly Ice Lake-SP), the ARES-WHI0 server board leverages processing performance and expandability to deliver a platform that is powerful and flexible with the scalability to match any application.

The ARES-WHI0 is designed to combine industrial reliability and performance with AI capability on a standardized platform. Built on the ATX standard form factor, the ARES-WHI0 is powered by 3rd Generation Intel Xeon processors, delivering the next generation of high-end computing performance and support for vital data integrity and security technologies. The ARES-WHI0 server board comes equipped with five PCIe Gen 4 and two PCIe Gen 3 slots, allowing the board to power up to four GPUs. This support enables it to power performance demanding applications such as edge AI servers, AI-based visual inspection, frame grabbers, or for functional add-ons to meet the needs of individual applications.

Built with AAEON's focus on industrial design, the ARES-WHI0 server board is built with I/O features including DIO, six USB 3.0 ports, and Case Open headers. Additionally, AAEON offers industry-leading service and support to deliver a platform designed for a long service life.

Offering greater high-speed storage options, the ARES-WHI0 is equipped with eight SATA III (6.0 Gbps) ports, RAID support, as well as NVMe. The board also features six DDR4 2666 MHz slots, allowing for greater flexibility and storage speeds in data server applications.
