

Item no.: 277151

2.4 GHz, 9 dBi omnidirectional antenna, RP-TNC connection

from **10,08 EUR**

Item no.: 277151
shipping weight: 0.10 kg
Manufacturer: VARIA Group

Product Description

Wireless LAN omnidirectional antenna for 802.11b/g for indoor use. With this antenna, you can increase both the strength of outgoing signals and the reception sensitivity for incoming signals. The greater signal strength and increased reception sensitivity improve the reliability of short-range communications, as the signals are received clearly and distinctly, reducing retransmissions due to poor signal reception. The high-performance antenna is particularly suitable for wireless networks in businesses and the home, as it can receive strong signals even in remote and hard-to-reach areas. It is also ideal for large areas such as warehouses, public spaces, wireless hotspots and outdoor areas - wherever you need a larger reception area for your wireless network. Functions: - amplifies the radio signal of your wireless devices (2.4 GHz) - omni-directional operation (reception in a 360 degree range) easy to install, no configuration required - signal amplification: 9 dBi - frequency range: 2.4 GHz - 2.5 GHz - polarisation: linear/vertical - direction: omni-directional - Nominal impedance: 50 Ohm - Connector: RP-TNC - Dimensions: 15 mm x 380 mm - Weight: 62 g - Colour: black - Operating temperature: -20 °C to 60 °C - Storage temperature: -30 °C to 75 °C - Operating humidity: 0 % to 85 % (non-condensing)
