shipping weight: 0.10 kg

Manufacturer: VARIA Group

Product Description

Fan for 19" Rackmount

With the MagLev system the rotation of the rotor describes a full magnetic circulation. This prevents vibration and jolting of the rotating rotor. Since there is no contact between bearing and shaft, the bearing only touches the surrounding air as a result. The result is the creation of a cooling fan with exceptional features such as smooth rotation, low noise levels and exceptional longevity to meet any requirement.

General

- Model: Axial fan
- Technology: MagLev engine with VAPO bearings
- Noise: 12.3 dB
- Temperatur max.: -10°C to +70°C
- Pole number: 4
- Dimensions: 40 x 40 x 20 mm

Electrical values

- Voltage DC: 12 V=
- Current: 0.031
- Power: 0.38 W

Implementation

- Air flow: 5.5 CFM
- Rotation speed: 4500 RPM
- Protection class: UL Class A
