Product Description

Glass Touch Shutter

Make your home smarter as well as more stylish. The C321 of MCO Home is a new Glass Touch Shutter with elegant design and stable performance for controlling venetian blinds, roller shutter motors, shades and sunscreens. The wall panel can be used to wire roller shutters which are controlled by an AC motor (with limit). You can control all these different kind of shutters remotely through the Z-Wave network in combination with other Z-Wave devices or you use the two buttons on the touch panel. An automatical control is also possible if you combine sensors and the C321 in a automation scene. By its precious design and high performance you expand your Smart Home with another eye-catcher.

Features:

- Glass Touch Panel for controlling shutters, curtains and garage doors
- Stylish glass touch switch with two buttons and energy metering function
- Flush-mounted in 60x60 mm square or round junction box
- Power supply: 85-260VAC, 50-60Hz
- Output: 2x max. 3.5A
- Wireless technology: Z-Wave Plus
