📄 Product Description

Turris MOX PoE Add-On

The Turris MOX is a unique modular router suitable for small and medium enterprises, geeks and the households of all users who are aware of the internets risks. Thanks to its secure default configuration, automatic firmware updates and adaptive distributed firewall, the product is very secure. The Turris MOX is also open source – it runs a free Linux operating system (based on OpenWrt) on open hardware. You can buy a Turris MOX as a complete set (Pocket Wi-Fi, Power Wi-Fi and Classic) or build your own. For that you will need the basic set MOX Start which you can expand with one or more modules (MOX B, C, D, E, F and G) and add-ons (MOX Wi-Fi add-on (SDIO), MOX Wi-Fi add-on (mPCIe) and MOX PoE add-on).Key features of the MOX PoE add-on

The MOX PoE add-on can be used to provide power to the Turris MOX router over Ethernet without having to use a separate power cable. It connects to the MOX A (Basic) module which is part of all MOX configurations. It is compliant with IEEE standards 802.3at and 802.3af.
