Product Description

wAP LTE kit US - Small weatherproof wireless access point with United States LTE modem

The wAP LTE Kit-US is a small weatherproof wireless access point with a built-in cellular modem that supports 3G and 4G (LTE) connectivity. Connect to the wAPs built-in 802.11b/g/n wireless and access the LTE network from your phone or any other wireless device. The wAP LTE also has one 10/100 Ethernet LAN port for your wired devices.

LTE cards are connected to two internal antennas with u.FL connectors, so if you want, you can unplug the connectors and add your own external LTE antenna for larger coverage. The unit has several powering options - 9-30 V PoE-in by Ethernet port, DC jack and automotive connector, very handy in vehicles like car, bus or train.

RBWAPR-2nD&R11e-LTE-US includes an LTE modem that supports LTE bands 2, 4, 5 and 12, mostly used by mobile operators in the United States, Canada and Latin America. Note: The use of this device is restricted or not permitted in some countries. Please inquire at the authority responsible for your country.

- Product code: RBWAPR-2nD&R11e-LTE-US
- Architecture: MIPSBE
- CPU: QCA9531
- CPU core count: 1
- CPU nominal frequency: 650 MHz
- Dimensions: 185 x 85 x 30 mm
- License level: 4
- Operating system: RouterOS
- Size of RAM: 64 MB
- Storage size: 16 MB
- Storage type: Flash
- Tested ambient temperature: -40°C to 60°C
