from **370,97 EUR**

Item no.: 337050
shipping weight: 1.80 kg
Manufacturer: GSM Activate

Product Description

GSM Activate Pro Alarm 20 - with PIR (passive infrared motion sensor)

The GSM Portable PIR Alarm is a standalone alarm system. It is suitable for indoor and outside installation. The Alarm Pro 20 can be paired with solar powered beams or outdoors PIRs. Customers can enable up to 20 devices with a wide variety of off the market sensors. Intruders will trigger the internal sensor that will then use the internal GSM technology to alert you via text or call immediately!

The unit requires a micro simcard to enable it to communicate with you. The unit has a 4G module chip which means it can use all simcards and therefore, connect to the strongest frequency whether that is 2G, 3G or 4G. The alarm has a built in program which monitors the simcard and keeps it active. Therefore, avoiding deactivation of the unit or simcard.

- Quad band frequency 850/ 900/ 1800/ 1900 MHz – 3G model 2100 Mhz 4G all bands
- Power Supply Voltage: 9 – 24 volts DC – 1 Amp min.
