26,39 EUR

Item no.: 345850
shipping weight: 0.10 kg
Manufacturer: Pimoroni

Product Description

Pico Unicorn Pack w/ 112 RGB LEDs

A sparkly matrix of over a hundred fantabulous RGB LEDs for all your rainbow needs and some handy buttons - sized perfectly for the Raspberry Pi Pico!

Pimoroni have resized their familiar Unicorn setup so that it fits nicely on the back of the Pico - with a tidy 7x16 matrix (that's 112 RGB LEDs!) it's surely the fanciest backpack going. The four tactile buttons can be used to switch between modes, as controls for simple games, or adjusting brightness.

It's possible to control the colour and brightness of each LED individually so you can use it to display animations, text, simple images, and more. Make a mini photo FX lamp, a smart status light for Zoom, use it to display colourful scrolling messages on your fridge, or just enjoy some pretty animations.

Note: A Raspberry Pi Pico is not included.

Your Pico will need to have male headers soldered to it (with the pins pointing downwards) to attach to add-on boards.

- 16x7 matrix of RGB LEDs (112 total)
- Individual colour/brightness control of each LED
- 4x tactile buttons
- Pre-soldered female headers for attaching to Pico
- Compatible with Raspberry Pi Pico
- Fully assembled
- No soldering required (as long as your Pico has header pins attached)
- Dimensions: Approx 62 x 25 x 10 mm (L x W x H, including headers and buttons)
- C/C++ and MicroPython libraries
