Product Description

SHELLYPLUS I4 - Shelly Plus i4 Controller

Shelly Plus i4 allows you to manually activate or deactivate any created scene, run synchronized actions, or execute complex trigger scenarios. Enhanced with an extremely fast processor, Shelly Plus i4 will immediately command the execution and notification of various actions. You can use Shelly Plus i4 to control other connected Shelly relays, sensors, or HTTP and MQTT-controlled devices. Small enough to be mounted behind every wall switch, Shelly Plus i4 can show the status and control the action of four inputs.

Features:

- Smart scenes activation to control other connected Shelly relays, sensors, or HTTP and MQTT-controlled devices
 - Wi-Fi operated: Connect Shelly Plus i4 to your Wi-Fi network, no hub required
 - Bluetooth: Add devices quickly and easily via Bluetooth connection, using the Shelly Cloud App
 - Wide range of voltage support: Shelly Plus i4 can be powered by 110-240 V AC
 - Multi-click support: Up to 12 possible actions; Control the lights, shut the blinds, turn off outlets; Run any Shelly device and scene you desire
 - Enhanced security: MQTT and WSS support, TLS and custom certificates support for a broad range of use cases
 - Improved API interface: Broad range of cloud connections and local integrations with much lower integration cost
 - Scripting: Shelly Plus i4 supports Java Scripts for customized and complex scenarios
 - Extremely fast processor: For immediate command execution and notification
-
- Dimensions (W x H x L): 41 x 36 x 15 mm
 - Net weight: 0.016 kg
 - WEEE: Yes
 - CE: Yes
 - IP rating: IP20
