41430 - Riser Card PCI Express x1 to x16 with 60 cm USB Cable

from **10,32 EUR**

Item no.: 353527
shipping weight: 0.10 kg
Manufacturer: Delock

Product Description

Riser Card PCI Express x1 to x16 with 60 cm USB Cable

The PCI Express riser card by Delock can be plugged into any PCI Express x1 slot on the motherboard. Then the x16 PCI Express slot can be mounted in a different position in the case. This allows a graphics card to be operated in each PCIe slot of a motherboard, even if the graphics card is wider than a single slot. By using several riser cards, several graphics cards can be operated simultaneously on one motherboard, e.g. for mining crypto currencies such as Bitcoin, Ethereum or Zcash.

The package content includes a USB 3.0 riser cable with a length of 60 cm. No USB signals are transmitted through this cable, therefore it is not possible to exchange it with a different or longer cable.

A PCIe x16 graphics card can be used with a PCIe x1 slot.

- Connectors: Motherboard side: 1x PCI Express x1, 1x USB 3.0 Type-A female; Riser side: 1x PCI Express x16, 1x USB 3.0 Type-A female, 1x Molex 4-pin power connector
- Data transfer rate up to 800 MB/s
- Supported operating system: OS independent, no driver installation necessary
- Physical characteristics: Length: 128.25 mm; Width: 43.50 mm; Height: 21.20 mm
