Product Description

RMS Connection Data Pack, 150 GB

Teltonika Networks' Remote Management System (RMS) is an all-in-one user-friendly IoT platform providing a smart way to stay on top of your whole connected solution completely remotely, securely, and reliably.

It is a powerful solution for remote access and management allowing users to save time and operational costs while being flexible and easy to use. With RMS you can manage compatible Teltonika Networks routers and gateways, reach remote devices, utilize the power of remote desktop access and configure secure VPN tunnels with just a few clicks.

To fit the requirements of different user profiles, Teltonika offers various functionalities of RMS available separately, so you may choose only what your business needs and save on costs.

RMS Connect

RMS CONNECT is a unified access system which allows you to reach and control smart devices remotely with RMS. If your PLC, industrial PC, CCTV camera, Point of Sale system or other intelligent device is reachable by one of RMS compatible routers or gateways, you can access it with RMS CONNECT without Public IP or additional VPN services!

- Provides access to RMS connections and RMS VPN services;
- You get 150 Gigabytes of data;
- The data in the packet is only used if the communication runs through the selected router or gateway.
