Item no.: 361319
shipping weight: 0.40 kg
Manufacturer: Delock

Product Description

This barcode scanner from Delock can be connected wirelessly to a PC, notebook or directly to a mobile phone or tablet. All common 1D and 2D barcode types can be detected precisely, even at long distances. In addition, the scanner recognises barcodes on displays and monitors.

Automatic adaptation to ambient brightnessThe scanner automatically adapts to the ambient brightness and captures up to 120 scans per second under optimal lighting conditions. In low ambient brightness, the barcode is illuminated by an additional white LED and can thus also be used in poor lighting conditions.

Robust workmanshipThanks to its robust workmanship, the scanner can easily withstand drops of up to 1.80 m, making it ideal for use in industrial environments.

Transmission via Bluetooth, USB or 2.4 GHzThe scanned barcodes are transmitted either via Bluetooth directly with the Bluetooth-compatible output device or via the 2.4 GHz frequency band with the help of the included USB dongle. Alternatively, the scanner can be connected to the computer with the enclosed USB cable.

NoteNot suitable for Swiss QR codes.
