

Item no.: 361543

Magn. USB data and charging cable for Micro USB / USB Type-C™ black 1.1 m

from **15,70 EUR**

Item no.: 361543
shipping weight: 0.10 kg
Manufacturer: Delock

Product Description

This USB data and charging cable from Delock features magnetic technology and enables quick and easy connection and disconnection between a device and the power source or a computer. With the help of the two enclosed magnetic adapters, various mobile devices, tablets, etc. can be charged or data transferred either via the Micro USB-B or USB Type-C™ connection. The cable also enables fast charging, e.g. with modern USB chargers. The adapters are designed so that they can remain in the socket of the device and prevent wear on the socket as well as serving as dust protection. The round magnetic connector on the USB charging cable allows it to connect magnetically to the device immediately. The cable is very durable and long-lasting due to its robust textile sheathing and metal housing at both ends of the cable.

Specification

- Connections:
- Cable: USB 2.0 type-A plug > magnetic connector
- Adapter:
- Magnetic connector > USB Type Micro-B connector
- Magnetic connector > USB Type-C™ connector
- Supports charging function and data transfer
- Maximum output current: 2.4 A
- Voltage: 5 V
