📄 Product Description

This Thunderbolt™ 3 cable from Delock can be used universally and combines all the advantages of the Thunderbolt™ 3 interface. It enables the connection of various devices, such as external enclosures, monitors, card readers and docking stations, via a Thunderbolt™ 3 port of a PC or notebook. The cable enables data transfer rates of up to 20 Gb/s and supports the transfer of USB as well as DisplayPort, PCI Express and Ethernet data. For example, the connection of a 5K or a 4K DisplayPort monitor is possible, as is the connection of USB 3.1 Gen 1 devices. It is also possible to supply power to connected devices with an output of up to 100 W.

Note: The maximum achievable data transfer rate of 40 Gb/s with Thunderbolt™ 3 can only be realised with a 0.5 m long cable (Delock 84844).
